

## USCA ACADEMIC ASSESSMENT COMMITTEE REVIEW SCHEDULE

The following schedule updates the three-year cycle for committee review of assessment practices of USCA's academic programs that award baccalaureate and master's degrees. The assessment process promotes ongoing curricular improvement and innovation through an analysis of the extent to which student learning outcomes are achieved. The review process assists in the documentation of the relationship between assessment and improvement to meet requirements for national and regional accreditation, the South Carolina Commission on Higher Education, and institutional academic program review.
